• At the moment, the built sewerage network covers a part of the Municipality of Pećinci in the populated places of Pećinci, Sibac, Subotište, Donji Tovarnik and Šimanovci, as well as a part of the Working Zone "North", "South" and "West" in Šimanovci! In this regard, the residents of these settlements of the municipality and a part of the companies that operate in the parts of the Work Zones in which the sewerage network has been built are connected to the sewerage system. The part of the company and the local population that is not connected to the sewage system does not pay for this utility service.
